*The University of Hong Kong*  
*Graduate Employment Survey, 2007*  
*( Bachelor's Degrees )*

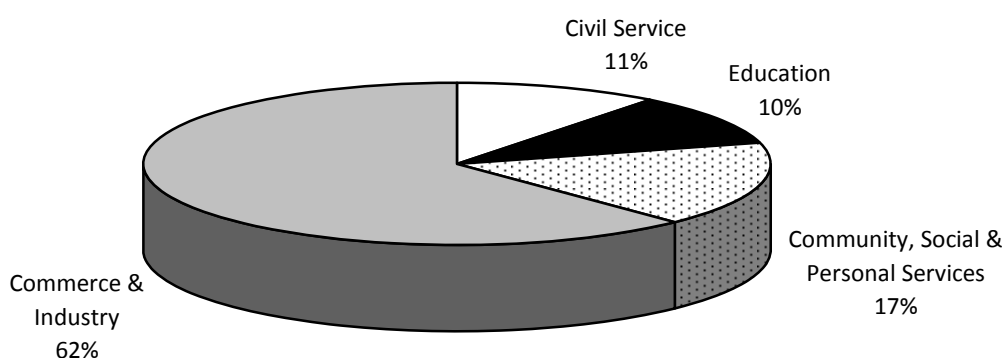

**I. Introduction**

- I. 1. The Graduate Employment Survey is conducted annually to collect information on the employment destinations of the current year's graduates.
- I. 2. This annual survey was conducted from November 2007 to March 2008 via different means. Email invitation to complete a web-based questionnaire was sent to graduates. During the gown collection period in November, the graduates were interviewed outside the gown collection counter. Those graduates who did not reply were interviewed on the telephone. Through the above means, information was obtained from 2,450 graduates, representing 90% of the graduating population of 2,712.
- I. 3. The situation reported by the respondents is as it was in December 2007 or six months after graduation and covers all full-time Bachelor's Degree graduates. Degree programmes are classified into ten Faculties, namely: Architecture, Arts, Business and Economics, Dentistry, Education, Engineering, Law, Medicine, Science and Social Sciences.
- I. 4. In the appendices, readers will find information on:
  - . employment situations;
  - . distribution by employment sector;
  - . distribution by occupation;
  - . monthly income by employment sector;
  - . monthly income by occupation;
  - . major occupations by Faculty; and
  - . monthly income by Faculty.
- I. 5. Other information, such as job satisfaction, relevance of work to study, further study and detailed information about the situation of graduates in specific study programmes, is not presented here but is available on request.

## **II. Situation in 2007**

- II. 1. Unemployment rate decreased from 0.5% in 2005 to 0.2% in 2006 and then stayed steady at 0.2% in 2007.
- II. 2. Out of the 5 unemployed graduates, 2 graduates had in fact been successful in securing a job offer but declined to accept, or resigned from the post, to await better opportunities. Hence, the real unemployment rate is only 0.1%, or 3 persons.
- II. 3. The graduates pursuing further studies decreased by around 1 percentage point (from 20% in 2006 to 19% in 2007).
- II. 4. Percentage of graduates successfully secured employment increased from 80% in 2006 to 81% in 2007.
- II. 5. Median monthly gross income increased by 7.2% from \$12,123 in 2006 to \$13,000 in 2007.
- II. 6. Commerce and industry continued to be the largest employment sector.

***Fig. 1. Employment by sector, 2007 Bachelor's Degree graduates***

II. 7. The largest groups by occupation in 2007 were:

·	Business Professional	23%
·	Medical & Health Personnel	16%
·	Teachers	9.2%
·	Accountants & Auditors	8.7%
·	Engineers	8.3%

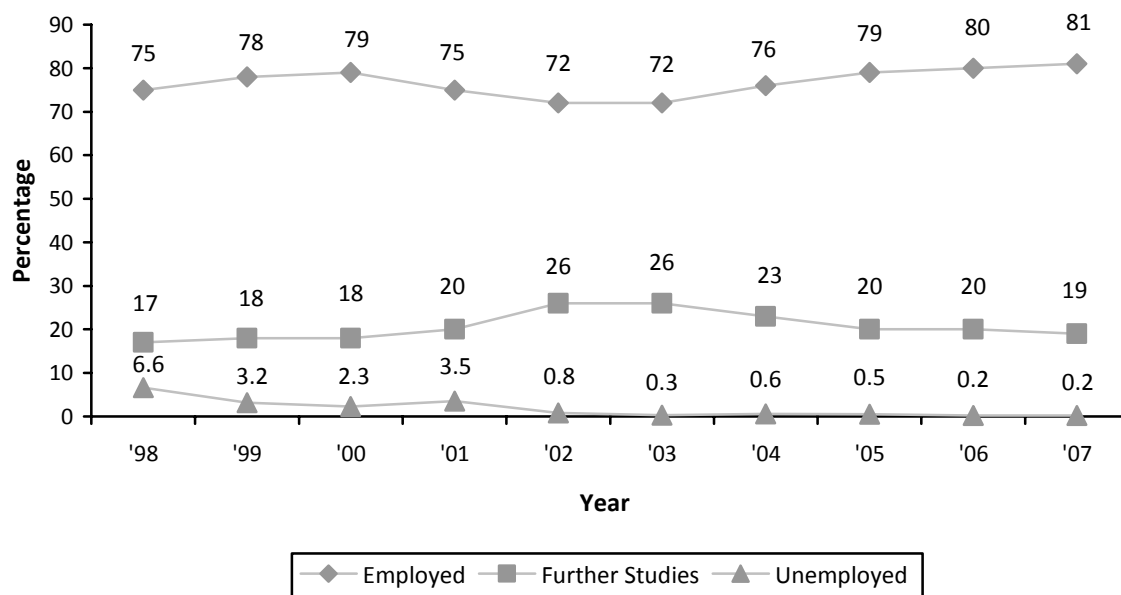

II. 8. Out of the employed graduates, 93% secured their job offers by the end of October. Fewer graduates secured employment compared with the same period of the previous year.

II. 9. Out of the employed graduates, 65% received more than one job offer. On average, each graduate received 2.2 job offers, which is about the same as that in previous year.
