The University of Hong Kong
Graduate Employment Survey, 2013
(Bachelor's Degrees)

I. Overall summary

The job market kept improving in 2013. The University of Hong Kong continued to achieve full employment in the class of 2013 graduates. The average gross monthly salary this year stayed similar to last year. More graduates chose financial institutions as their employment destination probably due to more job opportunities and better service conditions provided in the sector. Over the years, Commerce and Industry sector has remained to be the largest employment sector.

II. Methodology

1. Every year, the Graduate Employment Survey is carried out to collect the employment details from our graduates about six months after their graduation, as an effort to gain understanding of their employment situation.
2. This annual survey was conducted from October 2013 to March 2014 via different means. Email invitation to complete a web-based questionnaire was sent to graduates. During the academic gown collection period in October and November, the graduates were interviewed outside the gown collection counter. Those graduates who did not reply were interviewed on the telephone. Through the above means, information was obtained from 2788 graduates, representing 90.7% of the graduating population of 3074.
3. The situation reported by the respondents is as it was in December 2013 or six months after graduation and covers all full-time Bachelor's Degree graduates. Degree programmes are classified into ten Faculties, namely: Architecture, Arts, Business and Economics, Dentistry, Education, Engineering, Law, Medicine, Science and Social Sciences.

III. Key employment and salary trends

Employment

1. The unemployment rate remained to be 0.3% in 2013, and stayed the same for four consecutive years.
2. With the rise in graduates emigrated or returned to their home country, a corresponding decrease was registered in employment, from 78.9% in 2012 to 78.5% in 2013.
3. Of the seven unemployed graduates among the respondents, three graduates had in fact been successful in securing a job offer but declined to accept, or resigned from the post, to await better opportunities. Only four persons were unsuccessful in securing a job offer.

Further studies

4. The number of graduates pursuing further studies decreased from 19.7% in 2012 to 19.4% in 2013. The percentage of graduates pursuing further studies remained to be around 20% over the years.

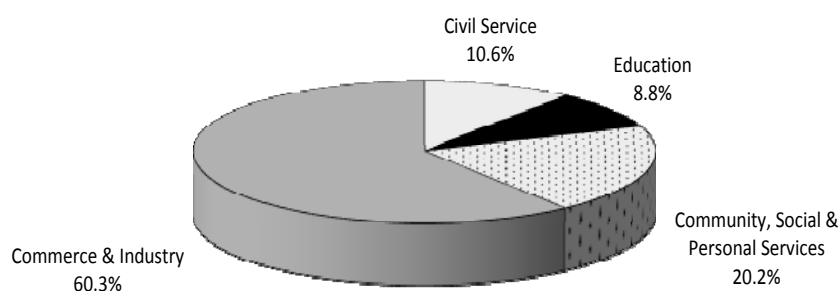

Salary trend

5. The median monthly gross income increased by 1.1% from \$15,833 in 2012 to \$16,000 in 2013. The average monthly gross income stayed similar (\$19,598 in 2012 and \$19,547 in 2013).

Employment markets

6. Commerce and Industry continued to be the largest employment sector and there was an increase of 1.2 percentage points compared to 2012. There was an increase in graduates joining Community, Social and Personal Services sector (from 19.0% to 20.2%) while there was a drop in graduates joining Civil Service sector (from 12.9% to 10.6%) and Education sector (from 9.0% to 8.8%).
