*( Bachelor's Degrees )*

**I. Overall summary**

Job market is gradually recovering from the 2008/09 financial crisis in 2010, the University of Hong Kong has continued to achieve full employment in the class of 2010 graduates. This annual survey reported the income rise as the average gross monthly salary went up by 4.3% from HK\$16,625 in 2009 to HK\$17,336 in 2010. The observation that more graduates chose financial institutions and business services as their employment destination, reflected a gradual economic recovery towards the end of 2010. It also revealed a decrease in further studies population and more graduates opted for employment during economic recovery. Over the years, Commerce and Industry sector has remained the largest employment sector, while Civil sectors have shrunk since 2009.

**II. Methodology**

1. Every year, the Graduate Employment Survey is carried out to collect the employment details from our graduates about six months after their graduation, as an effort to gain understanding of the employment situation of our graduates.
2. This annual survey was conducted from November 2010 to March 2011 via different means. Email invitation to complete a web-based questionnaire was sent to graduates. During the gown collection period in November, the graduates were interviewed outside the gown collection counter. Those graduates who did not reply were interviewed on the telephone. Through the above means, information was obtained from 2,812 graduates, representing 90.5% of the graduating population of 3,106.
3. The situation reported by the respondents is as it was in December 2010 or six months after graduation and covers all full-time Bachelor's Degree graduates. Degree programmes are classified into ten Faculties, namely: Architecture, Arts, Business and Economics, Dentistry, Education, Engineering, Law, Medicine, Science and Social Sciences.

### III. Key employment and salary trends

#### Employment

1. Unemployment rate decreased from 0.6% in 2008 to 0.2% in 2009, and slightly increased to 0.3% in 2010.
2. With the drop in graduates pursuing further studies, a corresponding increase was registered in employment, which went up from 76.0% in 2009 to 79.2% in 2010.
3. Out of the eight unemployed graduates among the respondents, three graduates had in fact been successful in securing a job offer but declined to accept, or resigned from the post, to await better opportunities. Only five persons were unsuccessful in securing a job offer.

#### Further studies

4. The number of graduates pursuing further studies decreased by nearly four percentage points (from 22.7% in 2009 to 19.2% in 2010). This decrement reflected the usual trend that fewer students opted for further studies during economic recovery. The percentage of graduates pursuing further studies remained around 20% over the years.

#### Salary trend

5. The median monthly gross income was increased by 7.7% from \$12,533 in 2009 to \$13,500 in 2010. The average monthly gross income went up 4.3% from \$16,625 in 2009 to \$17,336 in 2010.

#### Employment markets

6. Commerce and industry continued to be the largest employment sector, it marked an increase of 1.6 percentage points compared to 2009. There is a drop for graduates joining civil service sector (from 13.5% to 8.6%) while there is an increase in graduates joining community, social & personal services sector (from 18.1% to 20.8%).

**Fig. 1. Employment sectors, 2010 Bachelor's Degree graduates**

7. The largest occupational groups in 2010 were:

· Business Professionals	26.5%
· Medical & Health Workers	16.2%
· Teaching and Research Profession	13.7%
· Engineers	8.5%
· Accountants & Auditors	6.8%

### Job offer and source

8. Out of the employed graduates, 91.9% of them secured their job offers by the end of October, a slight drop compared to previous year (94.1%).

**Fig. 2. Month of receiving first job offer, 2010 Bachelor's Degree graduates**

9. Out of the employed graduates, 59.8% received more than one job offer. On average, each graduate received 2.09 job offers, increased from previous year (2.04).

10. Most of the graduates searched for job vacancies through job notices from Careers and Placement Section, CEDARS (24.0%), followed by newspaper / internet job boards (23.6%). They together accounted for about half (47.6%) of the job source.

#### IV. Changes on employment rate, salary & markets

Changes over the last ten years are shown in the following graphs and tables.

**Fig. 3. Employment situations, 2001 - 2010**

Over the years, around 80% of graduates opted for employment while around 20% of them went for further studies. The percentage of graduates securing employment dropped from 80.7% in 2007 to 80.1% in 2008, further down to 76.0% in 2009 and increased back to 79.2% in 2010. This reflected the recovery from the financial tsunami, coupled with the increase in the monthly income.

**Fig. 4. Median gross/basic monthly income, 2001 - 2010**

**Fig. 5. Distribution by income groups, 2009 - 2010**

Income range migrated upwards in 2010. Fewer graduates fell into the gross monthly income group of \$10,000 or below (6.9%, as compared to 14.6% in 2009). There were also percentage increases in the two higher income groups ranging from \$10,000 to \$19,999.

**Fig. 6. Employment sectors, 2001 - 2010**

Throughout the years the commerce & industry sector has remained the destination for most of the graduates.
