# The University of Hong Kong Graduate Employment Survey, 2012 (Bachelor's Degrees)

## I. Overall summary

The job market kept improving in 2012. The University of Hong Kong continued to achieve full employment in the class of 2012 graduates. This annual survey reported an income rise as the average gross monthly salary went up by 6.8% from \$18,350 in 2011 to \$19,598 in 2012. More graduates chose trading, marketing or retailing industries as their employment destination probably due to more job opportunities and better service conditions provided in these sectors. Over the years, Commerce and Industry sector has remained to be the largest employment sector. Civil Service sector has expanded while Education sector has shrunk since 2011.

#### II. Methodology

- 1. Every year, the Graduate Employment Survey is carried out to collect the employment details from our graduates about six months after their graduation, as an effort to gain understanding of their employment situation.
- 2. This annual survey was conducted from November 2012 to March 2013 via different means. Email invitation to complete a web-based questionnaire was sent to graduates. During the academic gown collection period in November, the graduates were interviewed outside the gown collection counter. Those graduates who did not reply were interviewed on the telephone. Through the above means, information was obtained from 2782 graduates, representing 91.4% of the graduating population of 3044.
- 3. The situation reported by the respondents is as it was in December 2012 or six months after graduation and covers all full-time Bachelor's Degree graduates. Degree programmes are classified into ten Faculties, namely: Architecture, Arts, Business and Economics, Dentistry, Education, Engineering, Law, Medicine, Science and Social Sciences.

#### III. Key employment and salary trends

#### **Employment**

- 1. The unemployment rate remained to be 0.3% in 2012, and stayed the same for 3 consecutive years.
- 2. With the rise in graduates pursuing further studies, a corresponding decrease was registered in employment, from 80.6% in 2011 to 78.9% in 2012.
- 3. Of the nine unemployed graduates among the respondents, three graduates had in fact been successful in securing a job offer but declined to accept, or resigned from the post, to await better opportunities. Only six persons were unsuccessful in securing a job offer.

#### **Further studies**

4. The number of graduates pursuing further studies increased from 18.0% in 2011 to 19.7% in 2012. The percentage of graduates pursuing further studies remained to be around 20% over the years.

#### Salary trend

5. The median monthly gross income increased by 5.6% from \$15,000 in 2011 to \$15,833 in 2012. The average monthly gross income went up by 6.8% from \$18,350 in 2011 to \$19,598 in 2012.

#### **Employment markets**

6. Commerce and Industry continued to be the largest employment sector, although there was a marked decrease of 1.8 percentage points compared to 2011. There was an increase in graduates joining Civil Service sector (from 10.4% to 12.9%) and Community, Social and Personal Services sector (from 17.2% to 19.0%) while there was a drop in graduates joining Education sector (from 11.5% to 9.0%).

•	<b>Business Professionals</b>	23.3%
•	Medical & Health Workers	18.4%
•	Teaching and Research Profession	11.2%
•	Engineers	9.6%
•	Accountants & Auditors	6.5%

#### Job offer and source

8. Of the employed graduates, 91.3% secured their job offers by the end of October, a slight increase compared to previous year (90.7%).

Fig. 2. Month of receiving first job offer, 2012 Bachelor's Degree graduates

9. Of the employed graduates, 60.6% received more than one job offer. On average, each graduate received 2.18 job offers, slightly decreased from previous year (2.22).

10. Most of the graduates searched for job vacancies through job notices from Careers and Placement Section, CEDARS (19.7%), closely followed by NETmatch / NETjobs / JIJIS (14.1%) and newspaper / internet job boards (15.7%). They accounted for nearly half (49.5%) of the job source.
